EXPERIENCE

Project Manager & Team Lead Intern

Cliqueha Information Services

02/2026 – 04/2026

- Led a 6-person team across 4 concurrent client projects — daily standups, sprint tracking, executive reporting
- Personally shipped Laravel features (stock logic, job order tracking, request slip refactor)
- Proposed a multi-tenant SaaS ticketing system architecture
- Bridged dev, QA, and management stakeholders across 4 client projects; owned QA for the proposed SaaS ticketing system

Backend Engineer Intern

Bitskwela

01/2026 – Present

- Sole backend engineer for a Web3 learning platform (Bitskwela) — architected full Django + Supabase + React.js stack from scratch, implementing blockchain simulation logic including wallet custody, consensus mechanisms, and transaction state management.

Founding President

TechCon

09/2025 – Present

- Founded and scaled a 111-member student tech organization
- Brokered the Bitskwela internship partnership
- Represented organization at Microsoft, AWS, and White Cloak events

EDUCATION

BS Computer Science

STI College Muñoz-EDSA

08/2022 – 07/2026

Quezon City, Philippines

- President’s Honor List: 2023-2025
- Best in Research: College Symposium 2025
- Best in Implementation: College Symposium 2025
- 1st Runner-Up: Code Fest 2025

Python for Data and AI Bootcamp

Uplift Code Camp

02/2026 – Present

PROJECTS

WaveLink

ISP Management Platform

08/2024 – 11/2025

- Engineered a production ISP management platform serving 1,000+ subscribers — delivered an AI chatbot, analytics dashboard, and payment module within a monorepo architecture; secured all endpoints via JWT authentication and deployment via GitHub CI/CD.

Deretso

Commuter Navigation

11/2023 – 04/2024

- Tech Lead of an 8-member team; built the full frontend for a route optimizer balancing cost, time, and efficiency across Metro Manila.
- Recognized at a national hackathon.

Family-Income-Expenditure-Analysis-and-ML-Modeling

Philippine FIES Dataset

01/2026 – 04/2026

- Built a full ML pipeline on the Philippine FIES dataset — performed EDA, feature engineering, and trained 10 models (5 regression, 5 classification) using Scikit-learn; delivered concurrently with two active internships demonstrating execution under constraint.

NLP Fundamentals and Application Sentiment Topic and Customer Segmentation

Womens Clothing E-Commerce Reviews

04/2026 – 05/2026

- Developed an NLP pipeline to analyze e-commerce and social media reviews using Hugging Face transformers and scikit-learn, implementing sentiment analysis, zero-shot topic classification, and K-Means clustering for customer segmentation with PCA-based dimensionality reduction.

SUMMARY

Full-Stack Software Engineer with proven experience leading cross-functional teams and shipping production-grade systems. Sole backend architect of a Web3 learning platform (Django + Supabase + React), led a 6-person team across 4 concurrent client projects, and engineered an ISP platform serving 1,000+ subscribers. Brings strong team leadership, sprint planning, and cross-functional communication skills to every engagement — grounded in system design, API development, and scalable architecture.

SKILLS

Languages: Python (Proficient), JavaScript (Proficient), PHP (Experienced), Java (Familiar)

Frameworks: Django (Proficient), Laravel (Experienced), React (Experienced), Next.js (Familiar)

Backend & APIs: REST APIs (Proficient, JWT Authentication, Node.js)

Databases: MySQL, Supabase, Firebase

Tools & DevOps: Docker / Docker Compose, Git, CI/CD

Data & AI: Pandas, Scikit-learn, EDA

Leadership & Soft Skills: Team Leadership & Mentoring, Project & Sprint Planning, Cross-functional Communication, Stakeholder Management

TRAINING / COURSES

COMPUTER SYSTEMS SERVICING NCII

5G IT-Training Center

Learn Functional Programming

Boot.dev

Learn Object Oriented Programming

Boot.dev

Learn Git

Boot.dev

Learn Linux

Boot.dev

Learn to Code in Python

Boot.dev
